Ecosystems of reviews

Carbon pricing: www.carbonpricing.science

Legend

● **Published and living evidence in progress:** Effectiveness – Published Paper
Contact: Niklas Döbbeling-Hildebrandt (Email)

● **In Progress:**

Innovation – *Contact: Trang Dong (Email)*
Carbon Intensity – *Contact: Mi Lim Kim (Email)*
Market Efficiency – *Contact: Banna Banik (Email)*
Labour Market – *Contact: Trang Dong (Email)*

○ **Needs Review:** Leakage, Distribution, Public Perception, Competitiveness

Contributing to the ecosystem

The focus is on meta-analyses of **empirical** evaluations of the **ex-post** literature that synthesize the **most recent information available** and ideally have the ambition to become **living evidence**.

1. Contributing existing reviews
2. Contributing new reviews
3. Contributing individually

1. Contributing existing reviews

Criteria

1. Evaluations of empirical and ex-post literature
2. Synthesis of most recent information available
3. Ideally ambition to become living evidence
4. Follow rigorous approach (e.g., in line with the protocol template)

Potential benefits

→ Integrated ecosystem of evidence for carbon pricing is likely to increase visibility

→ Synthesis paper(s) of the ecosystem

2. Contributing new reviews

Criteria

1. Evaluations of empirical and ex-post literature

2. Synthesis of most recent information available

3. Ideally ambition to become living evidence

4. Follow rigorous approach (e.g., in line with the protocol template)

Potential benefits

→ Resources, such as the evidence map and the protocol template, can be useful

→ Ecosystem meetings to receive feedback

→ We can mark your review on the webpage as "in progress" and add your contact information

→ Individual contributors might be interested to join your review

3. Contributing individually

→ We share a Google sheet with all interested persons and also add it to the webpage

→ You can add your interests and background

→ Researchers can team up to start a new review or existing teams can find additional collaborators

→ Review teams that search for collaborators can also list their review topics on the webpage, so that they can be approached
